DETAILED ACTION

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Hadley (U.S 5786730) discloses a transimpedance amplifier comprising: an amplifier (2), MOS resistor (8) and a voltage divider (potential divider defined by resistors 5 and 6), but lacks the second amplifier coupled to the gate terminal of MOS resistor device.

Yoon (U.S 6593810) discloses a transimpedance amplifier system comprising: a first gain stage (see detail of Fig 4) having a single input and an output, an NMOS resistor (15), a second amplifier (55) having an inverting input, a non-inverting input and an output being coupled to gate terminals of the NMOS resistor, a voltage divider (see Fig. 4, potential divider defined by resistors R1 and R2), but the first amplifier doesn't have two input terminals for inverting and non-inverting inputs.

Allowable Subject Matter

Claims 1-4 are allowed.

The following is an examiner's statement of reasons for allowance:

Claims 1-4 are allowed over the prior art because none of the prior art disclosed or suggested showing the particular structure recited in these claims namely:

Claims 1-4 call for, among others, a structure of a transimpedance amplifier comprising "a second MOS resistor" and "a resistor coupled between said first amplifier output and said second MOS resistor device drain terminal", in combination with the rest of the limitations of the claim(s).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
